

ChatGPT Export by NoXoZ.be

Product Guide - v6.0.0

Independent Brave / Chromium extension for exporting ChatGPT chats and complete ChatGPT Projects into structured Markdown ZIP archives.

This project is not affiliated with, endorsed by, sponsored by, or officially connected to OpenAI. ChatGPT and OpenAI are referenced only to describe compatibility with the ChatGPT web interface.

Core features

Feature	Purpose
Full Chat	Exports the current conversation as one structured ZIP.
Full Project	Exports all chats in the current ChatGPT Project.
Markdown	Creates readable text exports for long-term use.
Upload/	Stores retrievable files uploaded by the User when enabled.
Download/	Stores retrievable files offered by Assistant responses when enabled.
INDEX.md	Summarizes every project chat with message and file counts.
Dev mode	Provides logs, counters and diagnostics.

ZIP structure

```
Full Chat:
ChatName__export_YYYY-MM-DD-HH-MM-SS.zip
|-- ChatName__export_YYYY-MM-DD-HH-MM-SS/
|   |-- ChatName__export_YYYY-MM-DD-HH-MM-SS.md
|   |-- Upload/
|   |-- Download/

Full Project:
Full Project - ProjectName__export_....zip
|-- INDEX.md
|-- Project - ProjectName - Chat01__export_.../
|   |-- Project - ProjectName - Chat01__export_....md
|   |-- Upload/
|   |-- Download/
```

The Markdown export is stored in the same chat folder as the Upload and Download folders. Project INDEX.md remains at the project ZIP root.

Interface controls

Maxi: Export Full Project, Export Uploaded Files, Export Downloaded Files, Export Full Chat, Export From Start, Export From End, Start Export.

Mini: FULL, START, END, PROJECT, UPLOAD FILES, DOWNLOAD FILES, Start Export.

Blue means enabled or selected. Gray means disabled or not selected.

v6.0.0 file handling

v6.0.0 normalizes malformed generated-download names such as INSTALL.mdDocumentOpen back to INSTALL.md.

It also rejects a generic ChatGPT HTML viewer page when the expected file is Markdown, ZIP, PDF, image or another non-HTML file.

Security, privacy and license

The extension works locally in the browser and does not include analytics, telemetry or a separate NoXoZ.be export backend.

When file bundling is enabled, eligible ChatGPT/OpenAI-hosted resources associated with the active session can be fetched for inclusion in the local ZIP.

This package is provided under an all-rights-reserved license by Bruno DELNOZ / NoXoZ.be. See LICENSE.md for details.
